Research preview:

Self-healing clusters based on prometheus alerts

<Dario Maiocchi>

SUSE

Warning:

This is a research topic, so nothing is yet already shipped and implemented on the products.

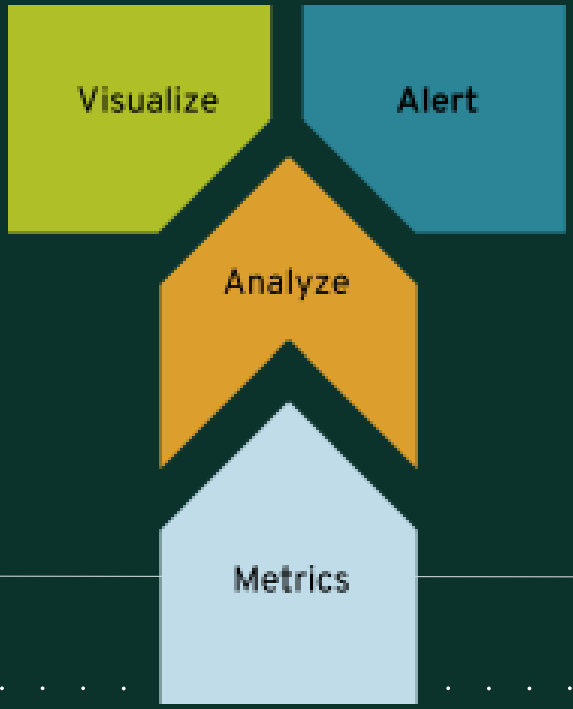
Things can changed/improved.

Highlevel usage:

SBD timeout is to low.

Systems detect and fix automatically.

SUSE



SUSE

Alerts events can create self-healing systems

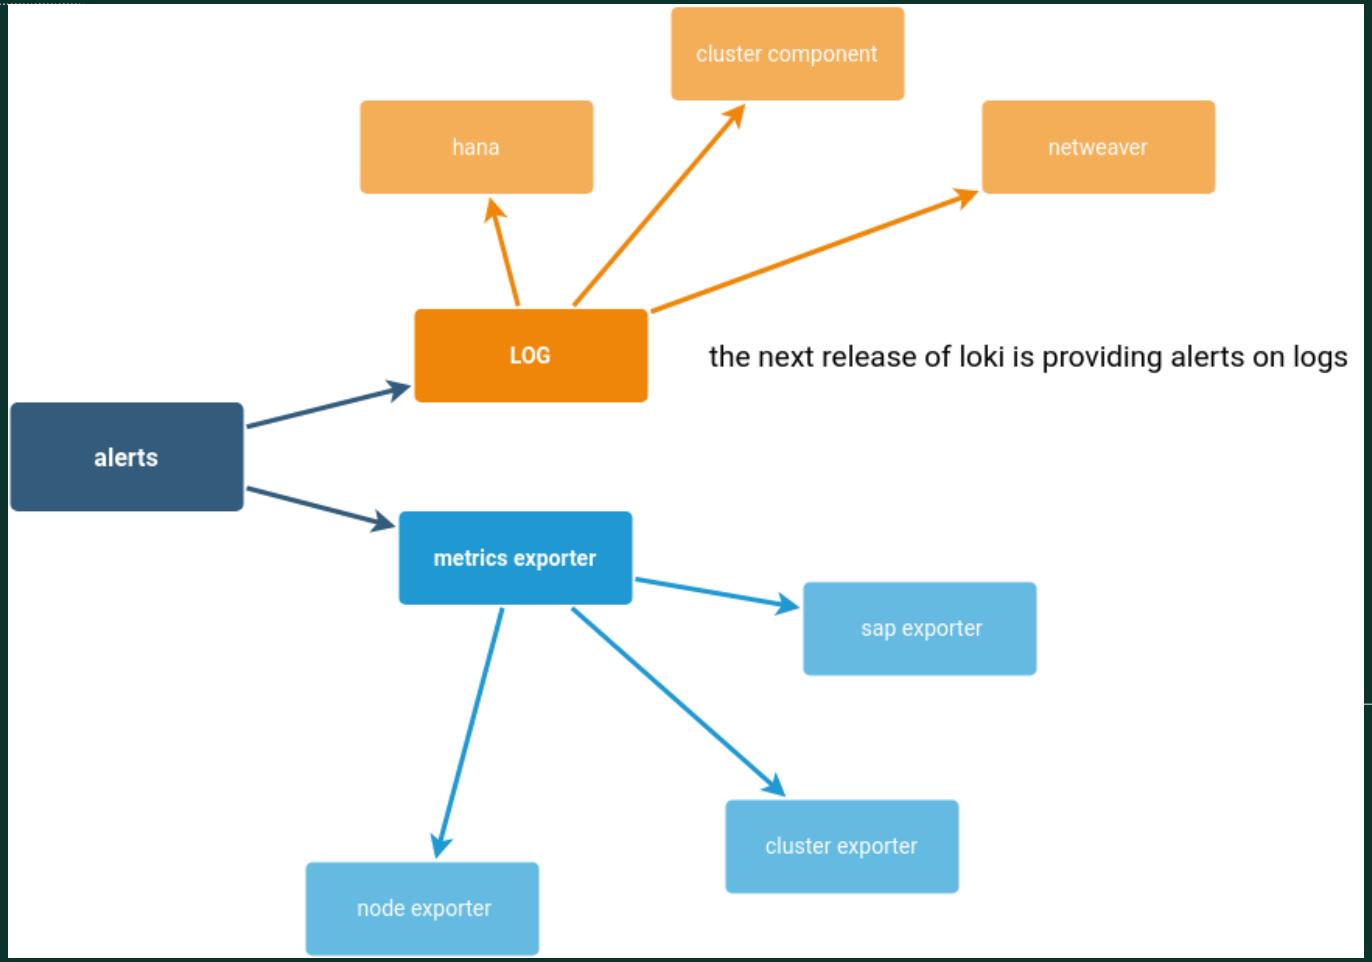
implementation

Use alertmanager and use golang mux route handler for implementing custom handler of alerts.

(https://github.com/gorilla/mux)

Consideration:

We do have already all needed components (execpt of the minimal binary handler)



cluster component
